"Killarney" Lawn

# Sow *Killarney* LAWN SEED and Walk on Velvet

FAMOUS SINCE 1905

HIGH GERMINATION AND PURITY - MAXIMUM FREEDOM FROM WEEDS - TESTED AND PROVEN

**KILLARNEY** is a modern Lawn Seed mixture composed of the best imported and domestic grasses that will produce the finest and most permanent turf possible. Free of Ryegrass and Timothy, it is a carefully blended formula of the permanent, sod-forming grasses Kentucky Blue, Chewings Fescue, Fancy Redtop and Bent. In full sun or light shade, under ideal conditions **Killarney** will produce a deep rooted, luxuriant, velvet turf that should last for years. We have carefully improved this mixture over the years and guarantee that a trial will convince you of its quality.

Prices (Transportation Paid):

Lb. \$1.75, 5 lbs. \$8.50, 25 lbs. \$40.00, 50 lbs. \$77.50, 100 lbs. \$150.00

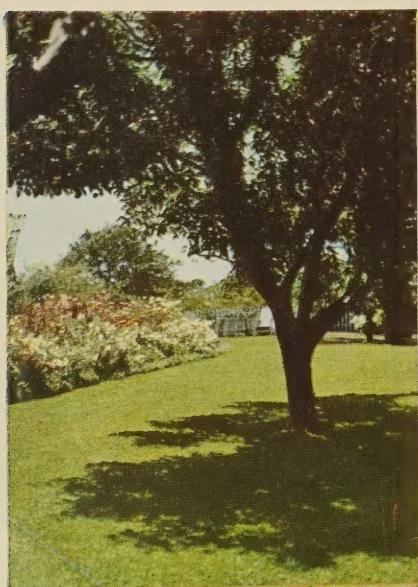

## Shady Place **Lawn Seed Mixture** for Dense Shade

A carefully proportioned mixture of shade-tolerant grasses that will produce a good turf in fully or partly shaded areas under trees. Soil under trees is in most cases impoverished and grass roots have to compete for food with the tree roots themselves. Therefore it is wise to fertilize liberally in early Spring and early Fall to keep the turf growing and in good condition. (We recommend the organic fertilizer **Agrinite** for this purpose—see page 62). If the soil is found to be too acid through lack of sunlight and dampness, add lime and work in well before seeding. Although particularly recommended for shaded areas, the proportions of grasses in **Shady Place** is sufficient to make it adaptable for use in both sunny and shady spots.

Prices (Transportation Paid):

Lb. \$1.70, 5 lbs. \$8.25, 25 lbs. \$38.50, 50 lbs. \$73.50, 100 lbs. \$142.00

**GRASS SEED QUANTITIES** For all general purposes, 1 lb. will sow 150 to 200 sq. ft.; 150 to 200 lbs. per acre. Use one-half these quantities when renovating an old lawn. **Consult Us About Your Lawn Problems—We Are At Your Service.**

# Lawn Grass Seed Mixtures

## The Satisfaction of a Perfect Lawn

A fine lawn is obtained by the careful and exact fulfillment of three fundamental requirements. Careful preparation of the seed bed, the use of good grass seed and the proper maintenance of the turf once established. These three factors are of equal importance, and failure to meet any one of these requirements will make the efforts expended of little avail. **Burnett Bros. Inc.**, with a reputation of supplying grass seeds of the highest quality for a period of 51 years, assume the responsibility of guaranteeing good seed.

### Merion BLUE GRASS FORMULA

(Containing  
100% Peren-  
nial Grasses)

Sensational new Lawn Seed mixture containing the "Miracle Grass" Merion Blue (B-27) which differs from the well-known Kentucky Blue Grass in that it is more resistant to heat and disease. Combined with Highland Bent, Chewings Fescue, and a small percentage of Fancy Red Top, this formula produces a thicker turf that stays green all Summer and stands close mowing. This mixture does not grow quickly but once established will last indefinitely and thrives under a wide range of conditions. One pound covers three times as much as regular Lawn mixtures, thus making it no more expensive to sow an equal area.

### 'Bank and Terrace' Lawn Mixture

Superb quality mixture of deep-rooting, strong growing grasses that will provide a fine velvety lawn on banks and terraces. Established turf holds the soil and prevents erosion on these areas. Lb. \$1.70, 5 lbs. \$8.25, 12½ lbs. \$19.75, 25 lbs. \$37.75. (Erosion aid in terrace building—see page 2).

# STRAWBERRY PLANTS—POT GROWN

Strawberry Plants are not difficult to grow and readily adapt themselves to a great variety of soils and climates. Pot-grown plants can be set out in the field at any time during the Spring or late Summer and early Fall months, as their strong, fibrous roots take hold quickly in new location, and can be depended upon to produce bigger crops of larger berries than field-grown layer plants.

A careful selection of varieties will insure fresh berries in the garden from early June until late Fall. This can be accomplished by choosing an **early**, a **midseason** and a **late** fruiting type as

## STRAWBERRY CULTURE

**PREPARATION OF SOIL:** Dig bed for your plants to a depth of 14 inches and incorporate well rotted manure (not fresh manure) or decomposed leaves with the soil. Afterwards scatter Bonemeal on each bed, raking it well into the surface.

**PLANTING INSTRUCTIONS:** When plants arrive, unpack at once and place in a shady spot, sprinkling them lightly with water. After hot sun has gone down in early evening, dip each root ball in a pail of water and loosen the soil with the fingers. Be careful not to knock soil from the roots. When planting, set the plants 1 foot apart in the row, spacing the rows 2 feet apart. Plants need a minimum of 6 hours sun a day so do not plant in very shaded location.

**RULES FOR SUCCESS:** Most important rule is to keep weeds down by cultivating which will also loosen the soil, preserve moisture and induce healthy growth. If good, clean salt hay is available it is advisable to mulch the entire bed about the time green berries are forming, working hay well under the leaves. This practice keeps down weeds during the fruiting season, keeps berries clean and free from rot and preserves soil moisture. In early Winter mulch the beds with a light covering of coarse manure, evergreen boughs, salt hay or similar material.

# Single Asters—Artistic and Graceful Cutflowers

## BURNETT'S BEAUTIFUL ASTERS

The introduction of a Wilt-resistant strain of Asters of recent years has helped tremendously in restoring this beautiful flower to popular favor as a garden plant. Up until the time of the origination of this resistant strain, garden enthusiasts were becoming discouraged trying to grow Asters outdoors with the wilt-disease so prevalent. # New! BURNETT'S PERENNIALS *Versatile*

## OUR OWN INTRODUCTIONS and SELECTED FAVORITES

Our perennial plants are all strong, field-grown or potted stock. They are **vigorous, young plants** that will readily establish themselves permanently in your garden. Do not buy perennial plants by size alone. Large, old clumps are never satisfactory and will soon die out when transplanted. **Plants are not sold in any quantities less than those priced.** 5 plants of any one variety are sold at the 10 rate. Take advantage of this saving over the smaller quantities.

**Cultural Hints**—Never plant Hardy Perennials too deep, and as a rule they prefer a well-drained, loamy soil that is neutral or slightly alkaline. Poor soil should be well prepared beforehand by digging in well-rotted manure with bonemeal added if possible. When fertilizing make sure no commercial fertilizers ever come in direct contact with plant as this will burn young roots and lower foliage. Keep weeds down and soil loose around plants by frequent cultivation.

# FLORAL SPECIALTIES FOR 1956

## ZINNIA PLUS X CACTUS HYBRIDS

Sensational New strain of the recently introduced cactus Zinnias. Plus X Zinnias are entirely different from all other strains. The seed is obtained from the F-2 and F-3 generations of individual crosses of all the choice separate colors. This seed production procedure gives you in every seed—outstanding hybrid vigor-size and profusion of bloom; plus a galaxy of new colors, shades and bicolor effects. Giant (but graceful) blooms 6 to 7 inches in diameter. All highly double, true cactus types, singles and poor doubles have been eliminated by this extra scientific selection and breeding.

Pkt. 50c, 3 pkts. \$1.35, 5 pkts. \$2.00.

## PETUNIA, Carnival

An F-2 hybrid assortment of colors so varied and extensive that many of the intermediate shades defy description. Vigorous 12 to 15 inch high plants covered with gayly ruffled and fringed flowers all summer. The size of flower varies from 2 inch to as large as 3 1/2 inches in diameter. For an enchanting display of color don't miss Carnival for 1956.

Pkt. 50c, 3 pkts. \$1.35, 5 pkts. \$2.00, 1/32 oz. \$6.00.

## PETUNIA, Fire Dance (All-America Winner, 1956)

The only All-America Winner in Annual Flowers for 1956. A new color combination in Petunias, glowing scarlet-salmon with very attractive contrasting golden yellow throat. The large 3 to 4 inch diameter flowers are delightfully fringed and ruffled. Growth habit is very vigorous yet plants are uniformly dwarf and compact averaging 12 to 15 inches in height with a spread of 20 to 24 inches.

Pkt. \$1.00, 3 pkts. \$2.85, 5 pkts. \$4.50.

## ZINNIA, Ice Cream

The first, truly pure cream Zinnia. "Ice Cream" is not a shade of buff, yellow or white but an honest to goodness New Cream color. Giant cactus type blooms, 6 inches and more in diameter, reselected for uniform doubleness. One of the few colors that will harmonize with any other flower color. The high light of your 1956 garden for lovely contrast planting and the delight of all for exquisite floral arrangements.

Pkt. 50c, 3 pkts. \$1.35, 5 pkts. \$2.00.
